Career Summary

A highly empathetic team builder with a strong customer-centric mindset. I am seeking a position with a group of people who are committed to delivering excellent software that is accessible to everyone and who bring diverse perspectives to our work.

Team Lead / Software Engineer / Product Owner

I have experience leading teams of software engineers and designers to deliver on quarterly OKR goals. The work to achieve these goals included writing software, working with stakeholders to define and prioritize work to ensure that we are delivering value to our customers and meeting our goals, and reporting on team status on a bi-weekly basis. I have experience defining and working to improve agile processes for teams which included leading several of the meetings and tasks required in that defined process. I have been a representative for crucial partner meetings, participated in hiring and onboarding new team members, and have been a mentor to junior team members.

Strengths

Agile processes • Team communication • Time management and working independently • Programming • Problem solving • Learning new languages and technologies

Skills

Project management • Agile Methodologies and Practices • VueJS • ReactJS • EmberJS • Javascript • HTML • CSS • Ruby • Ruby on Rails • SQL • Git
